

Salareen Strategic Fundraising Document

GetSchoolled Ecosystem · Seed Outreach Pack

Document Version 1.0 · Confidential · July 2026 · Platform build v0.44.0

Salareen / GetSchoolled platform ecosystem

This pack is for select EdTech and applied-AI investors. It includes a ready-to-send cold email, a four-slide brief outline, market-window framing, an investor directory, and a SAFE valuation-cap framework — aligned to the live Salareen product running on Vultr Kubernetes (VKE).

Confidential. Revenue, SAFE, and valuation figures are fundraising assumptions for outreach drafts and require counsel review before use.

1. Investor Cold Email Template

Subject: Seed Stage: Multi-Agent AI EdTech (\$1M+ Run-Rate) / 60-Day Deployment Runway

Dear [Partner Name],

Salareen is an enterprise-grade, multi-agent AI education platform running live on Kubernetes (Vultr VKE) with 600+ self-paced courses localized across 27 languages. We are currently generating early seven-figure revenues through custom B2B corporate compliance tracks (OSHA/DMV) and instructor marketplace commissions.

We have built 60% of our core consumer "Netflix-style" subscription engine. We are raising a Seed round via a SAFE note to secure a 60-day deployment runway to finalize feature qualification, complete comprehensive QA, and fund our Q3 marketing launch.

Why Salareen Wins:

- **Proprietary AI Tutor:** Powered by our socratic AI agent (Theodore) utilizing an LLM endpoint abstraction (NVIDIA Nemotron/GPT-4o).
- **Machine Vision Safeguards:** Built-in opt-in computer vision microservice (OpenCV YuNet/SFace) tracking student attention and securing anti-cheating classroom authentication.
- **Adaptive Learning Engine:** Real-time Bayesian Knowledge Tracing (BKT) that automatically profiles student engagement and scales difficulty dynamically.
- **Gamified Ecosystem:** Includes a 3D open-world educational RPG (Salareen Worlds) built on Three.js to maximize student retention.

We are giving select EdTech and AI investors a technical look at our deployment pipeline before our subscription layers go live. Are you open to a brief 10-minute call next Tuesday to look at our live architecture and feature roadmap?

Best regards,

[Your Name]
Founder & CEO, Salareen

2. Pitch Deck Structural Outline

A tight four-slide investor brief for the 10-minute technical call. Pair with the longer 12-slide narrative in docs/pitch/ when deeper storytelling is required.

Slide 1: Vision & Traction

- **Heading:** Scaling World-Class AI Education Globally
- **Core metrics:** 600+ live courses, 27 languages, and 40+ global payment methods
- **Visual focus:** Interactive global map highlighting multi-language localization

Slide 2: The Multi-Engine Business Model

- **Heading:** Diversified Monetization Beyond Traditional SaaS
- **Key pillars:** B2B Enterprise Tracks, B2C Subscriptions, Marketplace Commissions, and RPG / Arcade Gamification
- **Visual focus:** Matrix diagram mapping enterprise cash flows to platform stability

Slide 3: Proprietary Technology Moat

- **Heading:** Production-Grade Microservices Architecture
- **Deep tech core:** Separate Kubernetes services for Orchestration, Perception (YuNet tracking), Memory (BKT models), Identity, Billing, Curriculum, Speech
- **Visual focus:** Technical architecture block diagram showing async FastAPI endpoints

Slide 4: The 60-Day Deployment Phase (The Ask)

- **Heading:** Milestone Target — Subscription Engine Final QA & Launch
- **Strategic use of funds:** 100% allocated to engineering payroll and targeted customer acquisition
- **Visual focus:** Timeline layout detailing the 60-day engineering sprint to public launch

3. Market Window & Readiness Analysis

Strategic Entry Window

- **Valuation leverage:** Investors get a lower entry point before subscriptions go live
- **Asset density:** Core tech stack, content harvester, LiveKit rooms, Drive Mode, and base code are fully functional on VKE
- **De-risked metrics:** Active B2B enterprise revenue minimizes early operational downside

Feature Gap Management

- **SAFE instrument:** Prevents premature down-rounds during QA phases
- **Development buffer:** Funding builds a 60-day engineering firewall for feature testing
- **Core validation:** Custom compliance modules prove the platform's stability under load

GetSchoolled Ecosystem Snapshot (shipped)

- Live AI classes with Theodore + grounded Ask · Group/solo LiveKit rooms
- Drive Mode audio · Corporate professional tracks with verified assessments
- Arcade + Challenge the AI · Salareen Worlds (Three.js) · Languages (27)
- Kids Academy · Careers match · Homework grader · HIL educator console
- Rewards · Free / Standard (\$19.99) / VIP (\$29.99) · Global payment routing
- Harvester → catalog · Opt-in vision (YuNet/SFace) · Adaptive / BKT engines

Netflix-style consumer home (subscription engine surface)

3b. Product Proof Points (for the 10-minute call)

Live AI class — Theodore + grounded answers

Drive Mode — hands-free audio learning

Corporate / professional training funnel

Learning Arcade — retention & engagement

4. Comprehensive Investor Directory

Investor Group	Target Firms	Core Thesis / Alignment	Check Size
Pure-Play EdTech VCs	Reach Capital Owl Ventures GSV Ventures	Global workforce learning and deep gamified student retention frameworks.	\$500,000 to \$3,000,000
Applied AI & Deep Tech	Gradient Ventures Precursor Ventures Two Sigma Ventures	Scalable multi-agent frameworks, computer vision, and offline edge capabilities.	\$250,000 to \$1,500,000
Non-Dilutive Capital	Lighter Capital Capchase Pipe	Rapid non-equity advances secured by live B2B revenue contracts.	\$100,000 to \$2,000,000

Outreach tip: lead EdTech firms with retention + B2B compliance traction; lead AI firms with Theodore, perception, BKT, and the VKE multi-agent architecture; lead revenue-based financiers with contracted B2B run-rate and payment history.

5. SAFE Note Valuation Cap Framework

Financial Assumptions

- **Current run-rate:** \$1,000,000+ via B2B contracts
- **Tech multiplier:** Premium for proprietary multi-agent architecture and 27-language infrastructure
- **Round size target:** \$500,000 to \$1,000,000 for 60-day runway

Recommended Valuation Cap Range

Bound	Cap	Rationale
Lower	\$8,000,000	Floor mapping to typical ~8x SaaS enterprise multiples
Target	\$12,000,000	Mid-market sweet spot: AI moat + deployment readiness
Upper	\$15,000,000	Premium if active B2B backlog exceeds \$1.5M

Investor Dilution (at \$12M Valuation Cap)

- **Scenario A (\$500K raise):** $\approx 4.17\%$ post-round investor ownership via SAFE cap math
- **Scenario B (\$1M raise):** $\approx 8.33\%$ post-round investor ownership via SAFE cap math

Note: Actual ownership depends on SAFE discount, MFN, and future priced-round terms. Have counsel finalize instrument language before circulating.

60-Day Use of Proceeds (illustrative)

Workstream	Allocation	Outcome
Engineering payroll / QA	~70%	Subscription engine feature qualification + load QA
Customer acquisition	~30%	Q3 marketing launch + B2B pipeline acceleration

6. Call-to-Action Script (for the Tuesday meeting)

- Minute 0–2: Live architecture walkthrough (VKE + services + Theodore class)
- Minute 2–5: Product demo path — Drive Mode → Corporate assessment → Arcade/Worlds
- Minute 5–8: Business model + B2B run-rate narrative + subscription go-live gap
- Minute 8–10: SAFE ask (\$500K–\$1M / \$12M target cap) and next diligence step
